

# Safetyline Jalousie: it's French for style and comfort

## Life's a breeze with these luxury louvres

Custom-made Safetyline Jalousie louvre windows are not only stylish and functional – they provide impenetrable security. With Safetyline Jalousie windows you can now open up your indoors with complete peace of mind.

The French-designed and Australian made louvre system allows you to control ventilation, natural light and heat to create a comfortable atmosphere.

Safetyline Jalousie louvre windows are ideal for a modern lifestyle. With Safetyline Jalousie louvre windows you get a perfect environment – at the touch of a button.

Glass or aluminium louvres provide a natural, soft ambience. And simple to use electronic controls are available to control ventilation, natural light and heat.

As an added bonus, sensors can be installed to automatically close the louvres during rain or excessive wind conditions.

Safetyline Jalousie windows not only offer impenetrable security, but they also offer an amazing view.

The louvres can be custom made to a maximum width of 1.4m – the widest span of any louvres on the Australian market. That means you get fewer louvre columns and a more expansive view, with maximum airflow.

Safetyline Jalousie has many advantages over traditional louvre windows. They provide all the benefits of a normal louvre window, but with

added security, quality engineering, modern styling and increased functionality.

The louvre system features inbuilt security, with the added option of stainless steel support rods, to provide absolute security from intruders. Even if the glass louvre is broken, the window remains secure.

And during inclement weather, an interlocking feature guarantees a watertight seal to block out wind, rain and insects.

Easy to install, Safetyline Jalousie louvre windows can be used in a wide variety of domestic and commercial applications, for both contemporary and traditional buildings. And the louvres can be fitted with internal insect screens and can also support air-conditioning. They can also be incorporated with an opening sash window to provide double-glazing for extra sound-proofing or added heat retention. They are also built tough to withstand cyclones. Sturdy cam driven operating mechanisms ensure a locked position of the glass louvre even in the most extreme windy conditions.

"With Safetyline Jalousie louvre windows your home will be cooler in summer and warmer in winter, says Safetyline Jalousie

Safetyline Jalousie louvre windows are ideal for a modern lifestyle. With Safetyline Jalousie louvre windows you get a perfect environment, at the touch of a button.

General Manager, Leigh Rust. "This can result in significant energy savings," he says.

These modern, stylish window systems can be custom made to suit any domestic or commercial application.

And design possibilities are endless with complete floor to ceiling capabilities and a wide choice of louvres.

Safetyline Jalousie louvre windows are made in Australia exclusively by SMR Designs Pty Ltd and are made in strict compliance with Australian Standards.

The unique design of Safetyline Jalousie louvre windows sets a new benchmark for security, functionality and sustainability.
